

VERSATILITY IN VITAL SIGNS

The **Cleo** is a new and intuitive approach to patient vital signs measurement. The **Cleo** can be configured to measure any combination of: non-invasive blood pressure, SpO₂, rapid temperature, and capnography (EtCO₂).

Weighing in at less than 3 LBS the portable **Cleo** is well suited for any patient care area by offering a multitude of vital sign combinations. The **Cleo** can be used as a basic pulse oximeter or configured to a NIPB/SpO₂/Temp spot check monitor. **Cleo** can also be configured to be a stand-alone capnograph or combination capnograph/SpO₂/NIPB monitor. The **Cleo** is well suited for both bed side and mobile spot check use.

The **Cleo** simplifies clinician use by incorporating a touch screen with a simple user interface making the **Cleo** intuitive for any user. A long life lithium Ion battery is standard and many mobile mounting solutions' are available for the **Cleo**.

Field Upgradeable THERMOMETER

Covidien Filac 3000™

Accurate within >/- 0.3C a Temperature Reading within 4 seconds

The Covidien Filac 3000™ plug-in thermometer module can be installed into the Cleo anywhere and anytime. This simple plug-in module adds the option of a 4 second oral temperature reading brightly displayed on-screen. The **Filac 3000™** supports infection control by utilizing single use probe covers and a probe isolation chamber when not in use.

Cost Effective Capnography CAPNOTRACK®

Infinium Capnotrack®

The Infinium Capnotrack[®] capnography system is a cutting edge low flow End-tidal CO₂ measuring system. The **Capnotrack**[®] uses a 50/ml per minute sidestream method to

deliver the most accurate EtCO2 readings. Non-proprietary sample lines allows the **Cleo** to be the industry's lowest cost per patient End-Tidal CO2 monitors. The **Capnotrack**[®] can be used on both intubated and non-intubated patients. The **Capnotrack**[®] sample line connection system uses filter cells to eliminate the potential of cross contamination.

Mounting Solutions A RELIABLE CONNECTION

IPX0

SAFETY

Meet the requirement of EN60601 series

Type of Protection: Degree of Protection: Sterilization or Disinfection methods:

Operation Mode: Protection Against Ingress of Liquids: Class I (on AC power), internally powered equipment (on battery power):Per I.E.C. 60601-1, clause 2.2.4 Type BF, defibrillation-proof CF - Applied part 70% isopropyl alcohol solution or a nonstaining disinfectant. Equipment not suitable for use in the presence of a flammable anaesthetic mixture with air or with oxygen or nitrous oxide Continuous
